

InnerClass::read

```
graph LR; A[InnerClass::read] --> B[ByteReader::byteCatch]
```

A diagram showing a call from `InnerClass::read` to `ByteReader::byteCatch`. The `InnerClass::read` node is a gray rectangle on the left, and the `ByteReader::byteCatch` node is a white rectangle on the right. A blue arrow points from the right side of the gray rectangle to the left side of the white rectangle.

ByteReader::byteCatch
